

## 35 - Der Desktop - Die Benützerumgebung KDE

- Create icons for programs on desktop
- K / Panel / Add Application then choose the application
- Multi screens (up to 8) and sticky pin on programs
- Suse Yast special window: `susewmif yast`

### ----- KDE2 -----

In KDE-2 the panel has its configuration in the file:  
`~/.kde2/share/config/kickerrc`

under:

`Applets=KMenuButton_1,WindowListButton_1, .....etc`

Top integrate Legacy applications into the KDE main menu, run the `kappfinder`
